

IT VPN Access SOP

SOP ID: SOP-IT-017

Department: IT

Employees who require access to internal systems from outside the office must use the company VPN.

VPN access requires multi-factor authentication.

New VPN access must be requested through the IT Service Desk.

The IT Security team reviews and approves VPN access requests.

Employees must not share VPN credentials with another person.

If VPN access stops working, employees should create a ticket with the IT Service Desk.

This SOP applies to employees authorized to access company IT systems.
